

C200M/CE Shot Blasting Installation

The C 200 M/CE is a mobile blast pot, pneumatically operated and could be used for metals blasting, concrete cleaning and other types of constructions (facades, monuments etc.).

The blast pot works with any type of granular abrasive: steel shot, electro-corundum, sand, vegetable abrasive, etc..

Benefits

- higher quality anticorrosive protection operations;
- higher performance;
- simplicity and reliability in operation and maintenance;
- higher mobility;
- under pressure blast pot, delivered with CE declaration

Accessories

- higher quality anticorrosive protection operations;
- higher performance;
- simplicity and reliability in operation and maintenance;
- higher mobility;
- under pressure blast pot, delivered with CE declaration

Technical specifications

Capacity	Metallic abrasive	800 kg
	Corundum	400 kg
	Grit	300 kg
	Glass beads	300 kg
Working pressure	6.0 - 10.0 bar	
Maximum pressure	12.0 bar	
Air connection	1 ¼ "	
Blast hose connection	1 or 1 ¼ "	
Volume	200 l	
Diameter	609 mm	
Height	1450 mm	
Weight	150 kg	
Air consumption	6 bar, nozzle 9,5 mm 6 bar, nozzle 8 mm 6,0 m ³ / min 4,0 m ³ / mi
