

# Blast Wizard 98-240/2/CE

The mobile blasting installation Blast Wizard 98-240/2/CE is a professional unit, pneumatically operated, and could be used for metal blasting, concrete and other types of constructions (facades, monuments), cleaning. The installation works with any type of granular abrasive material: steel shot, electrocorundum, sand, vegetal abrasive etc. The installation could be accessorized to be installed into an automated shotblasting system, with sealed connection to the abrasive silo.

The 98 Model is unique in its fiability. The equipment excels in ease of use and performance, guaranteeing the user a high production capacity and the lowest maintenance costs. The pressure losses, which are of great importance for the ability to blast, have been fully eliminated.

## Benefits:

- Increasing the quality of corrosion protection projects;
- High production;
- High safety in operation;
- Increased efficiency in operation;
- Certified pressure vessel CE to 12bar/18bar;
- CE certified installation regarding safety in operation, according to the equipments directive

## Accessories

- battery air helmet filters;
- manual command;
- quick couplers;
- blasting nozzles;
- filters;
- helmet air hose;
- blast sweatshirt;
- leather blast gloves;
- breastplate;
- full overalls;
- vortex.

## Technical Specifications

Blast Wizard 98-240/2/CE		
Capacity	Metallic abrasive	1140 kg
	Corundum	570 kg
	Grit	425 kg
	Glass beads	425 kg
Working pressure		6.0 bar
Maximum pressure		10.0 bar
Air connection		1 ½ "
Blast hose connection		1 " sau 1 ¼ "
Volume		285 l
Diameter		800 mm
Height		1410 mm
Weight		195 kg
Air consumption 6 bar, nozzle 9,5 mm		6,0 m <sup>3</sup> /min
